I really enjoy my satellite radio because I can listen to what I want, when I want. The horrible selection of radio in this region provides me with nothing worth listening to. I respectfully request that no injunctions be placed on my satellite radio. This is something akin to local TV stations trying to get Cable and Satellite TV removed from their region so that they can continue to provide substandard quality programming to their local regions. I LOVE my XM-RADIO!!!! I am a consumer and I pay for my services on XM, it is not up to NAB to decide if I can listen to a wide variety of content when I choose.
